

PRESS RELEASE

STALLERGENES GREER AND NUANCE PHARMA ENTER EXCLUSIVE LONG-TERM PARTNERSHIP FOR ACTAIR® SUBLINGUAL IMMUNOTHERAPY TABLET FOR THE TREATMENT OF HOUSE DUST MITE ALLERGY IN CHINA

Baar (Switzerland), September 3, 2025 – Stallergenes Greer, a global leader in allergy therapeutics, and Nuance Pharma, an innovation-focused biopharmaceutical company based in China, today announced they have entered into an exclusive long-term partnership agreement regarding the development and commercialisation of Actair®, Stallergenes Greer's sublingual allergen immunotherapy (SLIT) tablet for the treatment of house dust mite (HDM) induced allergic rhinitis.

Under the terms of the partnership agreement, Stallergenes Greer and Nuance Pharma will work together on the development and registration of Actair® in China. Nuance Pharma would be responsible for the subsequent commercialisation of Actair® on the Chinese market.

"We are excited by the prospects of this strategic partnership for Actair® in China. By leveraging Stallergenes Greer's strong heritage in respiratory allergen immunotherapy (AIT) and Nuance Pharma's proven expertise in market access as well as their established commercial platform in China, we aim to accelerate access to Actair® for patients in need. This major step forward underscores Stallergenes Greer's determination to provide valuable evidence-based treatment options for individuals suffering from house-dust mite allergies. It also supports our broader ambition to expand the availability of our AIT treatments across more geographies, while unlocking the full potential of Actair®," stated Dr Andreas Amrein, CEO of Stallergenes Greer.

"Respiratory disease is among Nuance's core areas of focus, and we are actively building a franchise with innovative solutions. Actair® is a perfect fit for our portfolio and strategy, as it represents a differentiated solution to address the medical needs in allergy. We look forward to a successful partnership with Stallergenes Greer, a leader in allergy therapeutics, on Actair® and beyond, to bring innovative therapies to Chinese patients" stated Mark Lotter, CEO and founder of Nuance Pharma.

Nearly 18% of China's population suffers from HDM-induced allergic rhinitis¹. Over the past five years, the number of AIT-treated patients posted double-digit growth, driven by the rising burden of HDM-induced respiratory allergies and thus highlighting the significant treatment gap. AIT has the potential to reach €1 billion within 10 years, making it the largest AIT market in the world.

Current Chinese guidelines and expert reviews recommend AIT as a first-line treatment for allergic rhinitis, particularly in moderate to severe cases. However, uptake remains limited by infrastructure and awareness hurdles. With the introduction of Actair®, Stallergenes Greer's HDM tablet, more patients will gain access to a convenient treatment option, addressing the needs of those living with HDM-induced allergies.

Stallergenes Greer's SLIT tablet for HDM-induced allergic rhinitis is already commercialised in 21 countries and territories with more to follow under the brand names Actair®, Orylmyte® or Aitmyte®.

PRESS RELEASE

With this agreement, Stallergenes Greer continues to advance its mission of improving allergy care by making immunotherapy treatments accessible in new and high-need markets.

ABOUT ALLERGIC RHINITIS

Allergic rhinitis is a worldwide disease estimated to affect around 400 to 500 million people^{2,3}, who are at higher risk of developing rhinitis exacerbation and asthma than the general population. Allergic rhinitis can include symptoms such as sneezing, a runny or itchy nose, nasal congestion and watery or itchy eyes, among others. Symptoms may be severe and can worsen over time and have a significant impact on quality of life.

ABOUT NUANCE PHARMA

Nuance Pharma is an innovation focused biopharmaceutical company, with both late-stage clinical pipeline and commercial stage asset portfolio. Focusing on specialty care, Nuance has established a differentiated combination of commercialised assets and innovative pipeline across respiratory, pain management, emergency care and iron deficiency anemia. With the mission to address critical unmet medical needs in Asia Pacific, Nuance deploys the Dual Wheel model that develops a global leading innovative pipeline, while maintaining a self-sustainable commercial operation in both China and Asia as a region.
